## Negotiations Update - September 14, 2015

The Negotiations Committees for SUN and SAHO met late into last week in Regina to continue discussions around improvements to the SUN/SAHO Collective Agreement.

The parties continue to work through a number of multifaceted issues, that often impact more than one area of the collective agreement, in a collaborative and proactive environment. Many of the items currently being discussed are long standing issues for both parties, for example the retention and recruitment of registered nurses, with such complex topics requiring thoughtful and transparent conversation.

The parties have made good progress on items of mutual interest that assist in clarifying and modernizing the Collective Agreement.

The parties will continue discussions throughout September and October.
